Water's Cool Shape-Shifting Trick!

Instructions

- Pour water into an ice tray or small cup.
- Place it carefully in the freezer.
- After a few hours, check—wow! The water is hard ice.
- Take the ice out and put it in a bowl.
- Watch as the ice slowly melts back into water!

Note to Parents

Take away Learnings

This activity helps children understand that water can change between solid and liquid states. It introduces basic science ideas about temperature and change, while strengthening observation skills and curiosity about everyday phenomena.
