

Activity

5

Floaty or Splashy?

Instructions

- Fill a bowl or tub with water.
- Find small objects from around the house (spoon, leaf, toy, coin).
- Before dropping each one in, guess—will it float or sink?
- Gently place the object in the water.
- Watch and see what happens!

Note to Parents

Take away Learnings

This activity helps children explore early physics concepts like floating and sinking through hands-on play. It encourages prediction, problem-solving, and comparison skills while introducing ideas about weight, material, and buoyancy in a fun, age-appropriate way.
